Stores and Webshops

With its easy-to-use interface and robust features, LNbits simplifies the process of integrating Lightning payments into your business, making it the perfect choice for anyone looking to tap into the benefits of this cutting-edge technology.

Running LNbits instead of other PoS apps gives merchants more control and customization over their LN payment processing, allowing for a more tailored and seamless integration into their existing business processes. Also can easily connect their website using the WordPress plugin and instantly begin accepting Bitcoin providing a easy, fast, and secure payment experience for your customers.

LNbits also have a market extension that can be used as your webshop, without need of a web framework.

LN bank for friends and family

You can be the LN Bank
for those who you care and they trust you.

Offline Payment PoS Devices

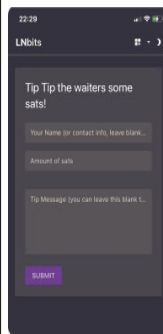

With LNbits, merchants can easily connect their website using our WordPress plugin and instantly begin accepting Bitcoin and Bitcoin via Lightning payments, providing a seamless, fast, and secure payment experience for your customers.

ATMs, Arcade & Vending Machines Hardware Wallets / Signing Devices

LNbits has all sorts of open APIs and tools to program and connect to a lot of different devices for many use-cases.

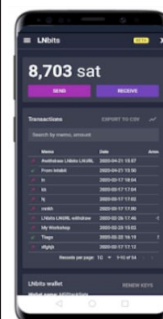

Tipjars, Donations, LN Address

If you run big on tips or donations you can open or print a small webpage with a QR-Code that your customers can donate or tip to. All tips can be automatically forwarded or shared among a group at the same or at different rates.

Each LNbits account could have a dedicated LN Address.

Automatic Withdrawals

LNbits lets you swap your received sats over LN into directly into your hardware-wallet at home in an automated way.

The Split/Scrub extension lets you forward incoming payments to another wallet automatically, e.g. to accumulate incomes from various sources to a certain wallet under your control.

Vouchers & NFC Cards

Merchants can easily create custom vouchers that showcase their brand and capture their customers' attention - whether as a printout or as an NFC card. These vouchers can then be redeemed for payments in your store or in other stores, providing a unique and engaging way to promote your business and to drive sales.

Give your customers a memorable experience they won't forget and will come back for!

Mark yourself on BTCmap

BTCmap.org is based on open streetmap and gives each merchant in bitcoin a free option to become visible to others !

Mark your spot and watch your new bitcoin customers coming into your store.
